

step-by-step webinar series

Microrite, Inc. brings you this unique learning experience in Static Charge: The Invisible Contaminant; Part of Microrite's step-by-step webinar series.

Static Charge: The Invisible Contaminant

Common belief is that static charge discharge is a concern only for eliminating damage to small components. This is not the case. Electrostatic charge causes the contaminants in the cleanroom atmosphere to be strongly attracted to the products which must be clean! Also robotics behavior can be badly corrupted by static discharges, sometimes shutting down production. This seminar will introduce the attendee to these issues and begin the process of improving manufacturing efficiency and yield.
